

About Me!!

Hello...!!
I'm Abhiram PV

I'm a 23-year old architecture graduate and consider myself to be passionate about both design and architecture. I've always loved making new things and venturing into unexplored territory because I fell in love with designing and crafts as a child. Pursuing this love of design through architectural design. I want to build spaces that are experiential and keep the user at the forefront of the process.

I'm looking forward to new learning encounters and wish to develop my skills and gain exposure and knowledge from the professional world.

This portfolio is a compilation of few of my selected academic as well as freelance projects from 2018 to 2023.
